SOUTH STUST. WASLINGTON-010 14TH ST.

IT MUST PE VENTILATED. The State Railroad Commissioners if

their report on the cause of the Fourth be ventilated. They assert that a feast share any of the people's burdens. thie and desirable plan would be to close the openings between the centre and side tunnels and construct ventilating towers at certain points from calcethe side tunnels in such a manner as to produce a draught strong enough to rid them of smoke and steam. They think, cause for investigation in the big strike of properly enough, that the subject is such miners at Scottdale. an important and difficult one that hast conclusion is undesirable.

The Commissioners are of the opinion that electric lights would affect the efficacy be cut short. of the signal system. This is the explanation offered by the New York Central Railroad, and which has been copele sively proven inaccurate. It has been shown that the tunnels lighted by electricity are more safe than dark been ventilated, then the best methods of however, it must be lighted for the comfort | assist and suffer id his mind, of the people riding through it, and also as ahead to prevent accident.

The report recommends that measures be adopted at once to prevent the recurrence toe and the others, of such an accident as that of Feb. 20. The gong signal should be improved so that it may be heard under all circumstances, and directs that constant inspection be made of and that no engineer or fireman be pereyesight and perception of color. No train, it says, should be permitted to pass through the tunnel at a greater speed than fifteen his fail,

missioners does not hold the management jurned the curious glances of the crowd with a neck, and they fit the figure much smoother ble in any way. The report says:

The Board finds that Lett's FowLER, engineer, and Charles A. Wellisofon, freman, were directly responsible for this accident in passing distant and home signals while set at danger, from
